

Welcome to B&B 't Morregaât,

Welcome to our accommodation. In this flyer, you can read how the electronic access system works and how you can easily open and close the doors.

You will find a keypad to the right of the front door. Enter the 6-digit code you received from us here.

The lights indicate how many digits you have entered.

Once all 6 digits have been entered, it will take a few seconds for the door to open. You will hear the lock unlock.

Made a mistake? Then press the triangle button.

Want to start over? Press the triangle button several times until all the lights turn off.

You will also find a keypad at the entrance door of your accommodation. Enter the same 6-digit code on the keypad next to the door as on the front door. After a few seconds, you will hear the lock unlock, and you can open the door using the door handle.

Stadspoort: Upon entering, double door on the right in the hallway.

Beekpoort: Continue straight ahead in the hallway, through the next door, and then diagonally to the left.

Made a mistake? Then press the triangle button.

Want to start over? Press the triangle button several times until all the lights turn off.

Stadspoort

Beekpoort

Upon entering, you will find a tag around the corner (on the door frame) that allows you to open and close both the front door and the accommodation door.

Upon departure, we ask that you lock the accommodation door and place the tag in the tag box in the hallway. It hangs to the left of the mirror.

With the tag, you can open the front door and accommodation door from the outside.

Hold the tag against the lock as shown in the photo, and press the round button once. After a few seconds, you will hear the lock unlock and you can open the door.

Would you like to lock the accommodation door? Hold the tag near the lock and press the round button once.

The main front door locks automatically as soon as it is pulled shut.

For your safety and ours, please check after closing or locking the door to see if it is really locked!

There is an electronic lock on the inside of the front and accommodation doors. You can open/close the door by pressing the round button or turning the round ring.

The main front door locks automatically as soon as it is pulled shut.

For your safety and ours, please check after closing or locking the door to see if it is really locked!
